

6 January 2012

ARLINGTON, VA: [Insight Systems Corporation](#) (Insight) – a business and IT consulting firm for government agencies and commercial organizations – and [Broadsword Solutions Corporation](#) (Broadsword), pioneers of the leading methodology for incremental and iterative process improvement, today announced a strategic partnership to assist Insight in adopting a plan for continuous improvement, using the Software Engineering Institute’s (SEI) Capabilities Maturity Model Integration, or [CMMI](#).

To help Insight reach its goals, Broadsword will apply the [agileCMMI Methodology](#) it pioneered to streamline the appraisal process for Insight, making the process more useful and efficient.

“We wanted to be more competitive in our market by having the [CMMI certification](#),” President [Nancy Abramson](#) said. “After conducting extensive research, we were impressed with Broadsword’s qualifications and services. We liked the delivery options and efficiencies that the firm offered.”

Broadsword’s president, [Jeff Dalton](#), said, “Insight has made an important commitment to applying the right amount of process at the right time, by utilizing an architecture and system based on the [CMMI as a framework for continuous improvement](#). We look forward to applying our management consulting, engineering, [process improvement solutions](#) to help the company outstrip their competitors and enhance their reputation for delivering superior value to their customers.”
